RE: WWRP- LP22-1625 Inchelium Skate park

Dear Mr. Carpenter:

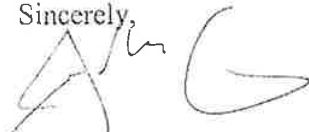

It is my pleasure to provide you with this letter of support on behalf of the Confederated Tribes of the Colville Reservation for the Inchelium Skate park. A project proposal such as this has a strong community purpose.

Indigenous people are known for creating community and I am sure that Inchelium will take full advantage of this opportunity if given the chance. The concept of social spaces and collective community-based identities is something that resonates well with us. As you are well aware, the closest skatepark on the reservation is 87 miles away in the city of Omak, a two-hour drive over three mountain passes. Local roads are narrow and lack shoulders or proper sidewalks for children to walk, run, bike, or skate safely.

Inchelium is strong and proud of its heritage: the reservation community of Inchelium rallied in support of the Canadian Supreme Court Decision to restore constitutionally protected rights to hunt in Sn̓s̓aʔckstx traditional territory. Community and place are intrinsic to people, culture, and Tribe.

As a gathering place, the Inchelium Skate park will become a place for our youth to create community and tie them back to the land. I enthusiastically support this project. Contact me at 509-634-2210 or email me at jarred.erickson.cbc@colvilletribes.com if you would like to discuss my thoughts on this project further.

Sincerely,

Jarred Erickson
CHAIRMAN

RE: Inchelium Skate Park Project
To: Boys & Girls Club of Inchelium

I am writing in support of the Inchelium Skate park project.

Inchelium is located in the remote mountains of Northeast Washington State, on the easternmost side of the 1.4 million-acre Colville Indian Reservation. Although surrounded by natural beauty, the area lacks safe and properly developed outdoor recreational facilities for kids. The closest skate park on the reservation is 87 miles away in the city of Omak, a two-hour drive over three mountain passes.

Local roads are narrow, and lack shoulders or proper sidewalks for children to walk, run, bike, or skate safely. This formula puts area youth at risk of injury and discourages healthy outdoor activity.

Positive points for the Inchelium Skate Park:

Skate parks in rural areas have proven to be beneficial to the health and wellness of their communities.

The proposed location is visible and convenient, adjacent to the soon-to-be developed Wellness Center. It is near the Inchelium School Complex, and near the existing Community Center, that houses the Boys & Girls Club.

Kids from other towns could do field trips with Boys & Girls Clubs to visit the skate park.

The draft Skate Park design has a concrete sturgeon-nose canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.

The Tribe already owns the land for the skate park, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skate park project and look forward to seeing it succeed.

Sincerely,

A handwritten signature in blue ink, appearing to read "Henry Hix-Chief".

RESOLUTION

WHEREAS, it is the recommendation of the Management & Budget/Community Development Committee to support the grant application to Washington State Recreation Conservation Office for the Inchelium Skate Park for grant award up to \$350,000.00 with a 10% percent match. The Chair or designee is authorized to sign all pertinent documents.

THEREFORE, BE IT RESOLVED, that we, the Colville Business Council, meeting in a **SPECIAL SESSION** this **21st day of April, 2022** acting for and in behalf of the Colville Confederated Tribes, Nespelem Washington, do hereby approve the above recommendation of the Management & Budget/Community Development Committee.

The foregoing was duly enacted by the Colville Business Council by a vote of **7 FOR 0 AGAINST 0 ABSTAINED**, under authority contained in Article V, Section 1(a) of the Constitution of the Confederated Tribes of the Colville Reservation, ratified by the Colville Indians February 26, 1938, and approved by the Commissioner of Indian Affairs on April 19, 1938.

Re: Inchelium Skate Park Project
To: Boys and Girls Club of Inchelium

To Whom It May Concern

As a representative of Colville Confederated Tribes, Parks and Recreation Department, I am writing in support of the Boys and Girls Club of Inchelium effort to pursue grant funding related to the design and development of the Park for recreational purposes.

Outdoor activities are valuable for many reasons, including health and wellness, encouraging young adults to remain active, to make friends and for social gathering.

The area lacks safe and properly developed outdoor recreational facilities for kids and the closest park on the reservation is 80+ miles away in the city of Omak, Washington which is a two-hour drive away.

We fully support the Inchelium Skate park project and look forward to seeing it succeed.

Sincerely,

Linda Palmer, Manager
Colville Confederated Tribes
Parks and Recreation

C/O Julie Phillips
P.O. Box 143
Inchelium, WA 99138

Dear Ms. Morgan,

On behalf of the Eastern Washington University College of Urban Planning and Tribal Planning Program, I would like to express our support for the Inchelium Skatepark. My grandfather is Colville and we have many relatives that live on the Colville Indian Reservation. I grew up traveling to Inchelium for sports, cultural events as well as camping. As a professor of Urban and Regional Planning I have taught workshops for Inchelium youth and filmed a short Public Service Announcement with Inchelium youth on Tribal Traffic Safety.

Inchelium is located in the remote mountains of Inland Washington State, on the easternmost side of the 1.4 million-acre Colville Indian Reservation. This is a reservation that in 2006 had a suicide rate five times greater than the average for tribal members in this state. Nationally, this number is far greater. Suicide is the leading cause of death for Native youth ages 15 to 24. This is our reality. As mothers, as aunties, as friends, as mentors. We are losing our beautiful children. No more. We assist their community by providing healthy outlets of recreation, communities of creativity, and safe spaces for education.

Skate parks have been linked to wellness promotion for both young people and adults and can function as a venue to nurture Native youth. Some proponents of skate parks use the popularity of skateboards and skating to link past and present in ways that teach history and expand ideas about contemporary Indigenous aesthetics. This phenomenon can also be a visible means to challenge stereotypes and rigid definitions of us and them.

The draft skatepark employs thorough co-development planning that prioritizes education, health and dignity. The location is visible, convenient and proximal to the Community Center, Inchelium School Complex, and the future Wellness Center. The location is ideal to facilitate accessible and safe outdoor recreation for children in the community, the adjacent Boys & Girls Club as well as in other visiting organizations. The skatepark design incorporates a sturgeon-nose canoe as a centerpiece to further engage children in cultural heritage. I fully support the Inchelium Skatepark project and look forward to seeing it succeed.

To Whom It May Concern:

Tri County Economic Development District (TEDD) would like to lend its enthusiastic support to the Inchelium Skatepark project.

TEDD believes that the addition of the Skatepark will enhance the quality of life for the youth in the area. This type of engaging infrastructure will enhance the community and make it a more desirable place to live and do business. Skateparks provide a safe and healthy recreation opportunity to their communities.

These are the type of projects that will contribute to more community and economic development in an area where growth is challenged.

Sincerely,

April 23, 2022

Dear Inchelium Skatepark Planning Members,

Re: Inchelium Skatepark support

My name is Shawn Brigman and I am the founder of Salishan Sturgeon Nose Canoes, a native owned business in eastern Washington. I am a Spokane Tribal member and descendent of regional northern Plateau peoples such as the sinixt, kalispel, and shuswap. All three of these Indigenous groups are historically documented as employing bark sturgeon-nose canoes. To date, I have sculpted five all natural bark sturgeon-nose canoes reflecting northern Plateau cultural heritage since time immemorial. In 2013, I also established a contemporary canoe design called a *Salishan Sturgeon Nose Canoe* with a unique frame assemblage and skin attachment method with over thirty in circulation. In 2016, I was awarded an artist-in-residence opportunity sponsored by the Longhouse Education and Cultural Center's Northwest Heritage Program within The Evergreen State College. The program sponsored me in skinning a *Salishan Sturgeon Nose Canoe* with Salish language learners for the Inchelium Language and Culture Association, which then paddled in the 2016 Kettle Falls Canoe Journey and beyond.

Now in 2022, I am pleased to write this letter of support for the Inchelium Skatepark project. With its proposed design of a concrete sturgeon-nose canoe as a centerpiece for skateboard tricks, this concrete educational component is an empowering opportunity for youth to learn about community heritage.

The Inchelium Skatepark project will provide recreational, educational, and community empowerment opportunities for the Colville Confederated Tribe of Indians to share cultural heritage with surrounding communities. Please contact me any time for further support.

Sincerely,

A handwritten signature in black ink that reads "Shawn Brigman".

Re: Boys and Girls Club of Inchelium Skatepark Project

I am writing this letter in support of the Inchelium Skatepark Project. As a historian, sociologist and writer based in Revelstoke, B.C., Canada, I have researched and written about the Sinixt people whose traditional homeland ran all the way north to include the land I now call home. I am ashamed to say that the settler government here made it impossible for the Sinixt to stay in this region. They were denied rights and access to their traditional lands and were pushed into the United States. As a result of this, Sinixt youth were denied the important attachment to their homeland.

In my view, Sinixt children and youth need extra support for positive, community-based activities. The skatepark, and its creative integration of Sinixt culture with the distinctive sturgeon-nosed canoe incorporated into the design, would be meaningful for children, youth and families. The children and youth would build confidence and agility as they learn skateboarding tricks and the skatepark could be a hub for young families. This project would promote the health and wellbeing of children, youth and families in Inchelium.

I hope you will support this worthy project.

Date: July 2nd, 2022

To: Boys & Girls Club of Inchelium

Subject: Inchelium Skatepark Support

I am writing in support of the Inchelium Skatepark project. We have been working tirelessly for many years to build a skatepark in Republic, WA and are very excited for Inchelium to also have a skatepark for its community. We have been overwhelmed with the positive feedback we have received on this project and know that this appreciation and support can be translated to the Inchelium Skatepark as well. People in Ferry County are desperate for more healthy recreation opportunities in our county.

Inchelium is similar to many other small towns, in that there are not many extracurricular activities for young people in the area. Skateparks have been shown to improve mental and physical health, reduce illicit behavior and property damage, provide a safer environment for skateboarding and have even created a positive economic impact (sponranch.com). The fact that this skatepark will be supported by the Inchelium Boys and Girls Club is a huge benefit. I look forward to future skate competitions and outdoor recreation festivals and activities that will connect the youth from Republic and Inchelium in a positive way.

The bottom line is that skateparks create a positive gathering place for a wide variety of people in conjunction with the fact that youth in these rural communities do not have as many safe, outdoor gathering places as urban dwellers. I can't wait to visit this new shining gem in our neighboring town.

Sincerely,

Anthony Houston

President

Republic Skatepark Committee

Dear People of Boys + Girls Club of
Inchelium,

I wanted to write to voice my
support of the possible Inchelium
skatepark! Skateparks are
a great way to invite kids to
have an all inclusive space
to learn a new sport in, and
meet new people! A skatepark
in Inchelium would be a cool
meeting place for local kids
where they can be engaged
in growing as people and in
skateboarding. At least this
is what my favorite skateparks
have done for me! Skateparks
rule! ~~Good~~ Thanks for your time

RE: Skatepark at Inchelium Wellness Center

Dear Julie,

I am writing with regards to the proposed Skate Park that you are applying for a State Grant for.

Firstly, despite my being 7000 miles away in Belfast, I would like to offer you my most fervent support. I have seen both first and second hand the good that can come of developments of any kind, that focus on the needs and well-being of young people in a community. In my current job, I work for an organisation that provides Social Funding. To briefly explain, it is a charity set up 20 years ago to provide loans for small Social Enterprises and Charitable Groups that provide real impact on a local level. We also manage Grant Funds for local government, so I see **daily** what comparatively small amounts of money can do for these groups.

I can see from the information provided by Bobby Whittaker (via Instagram in this case!) that the Boys & Girls Club of Inchelium clearly are focused on the good of the community around them. Proposals such as this always have a positive effect at so many levels.

- You will see the well-being of the young people improve, not all kids want to be involved in team sports, so a skate park allows a young person to progress with something that has a clear goal, at their own pace, and thereby adding to their self worth
- You will see their families feel like their children have a safe and positive space to go to, to express themselves, socialize and better themselves
- You will see local government see a decrease in anti-social behaviour, both perceived and real. Initiatives such as this always add to residents' sense of civic pride

So I guess I'm just saying I cannot see a good reason why your organisation should not receive this grant, and I would like to official add my name to your list of supporters!

With all good wishes

Nick (Heath)

INCHELIUM SKATEPARK SUPPORT

3-28-22

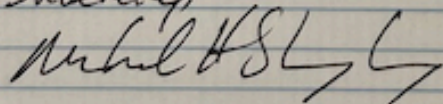

DEAR Boys & Girls Club of Inchelium
c/o Julie Phillips

I HAVE BEEN AN ACTIVE SKATEBOARDER FOR OVER 45 YEARS. I have watched the sport grow from a fad, or hobby, to a full-fledged Olympic sport. I am close friends with the major skatepark construction companies in the Northwest. I also sat on the Advisory Council to the Seattle Parks Dept. for three years.

Please, please, please continue the support and energy to provide Inchelium with a skatepark. I have watched hundreds of small towns build skateparks and I cannot stress enough the importance and benefits that a park will bring your community and the youth of the area. I have watched young local kids with little aim or direction, turn into amazing professional athletes who are featured in magazines.

Thank you for the hard work and energy you are putting towards this worthy cause.

Sincerely,

Michael H. Shaughnessy

The proposed location is visible and convenient, adjacent to the soon-to-be developed Wellness Center. It's near the Inchelium School Complex, and near the existing Community Center that houses the Boys & Girls Club.

Kids from other towns could do field trips with Boys & Girls Clubs to visit the skatepark.

The draft skatepark design has a concrete sturgeon-nosed canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.

The land for the skatepark is already owned by the Tribe, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skatepark project and look forward to seeing it succeed.

Sincerely,
Rio Whelshula

April 10, 2022

To: Boys & Girls Club of Inchelium

I'm writing in support of the Inchelium Skatepark project.

Skateparks are important to me because they create opportunities for all residents, especially kids, to enjoy healthy outdoor activities without any special equipment, entrance fees, or other costly barriers to entry. Having grown up in a rural area myself, I know firsthand how beneficial it is to have constructive places for kids to spend time outside of school — especially those who may not have recreation facilities home, or the ability to drive long distances for recreation.

A skatepark offers a safe place to hang out, get exercise, and connect with friends. The proposed design of this skatepark also offers a cultural component, to spark education about the community's history for residents and visitors. Generations of kids in Inchelium would benefit from the new skills, friendships, and sense of community gained in the skatepark.

I ask that you support the effort to bring a skatepark to Inchelium. I pledge to continue my support as a volunteer as this project progresses.

Sincerely,

Hello, I'm writing in support of the skate park.

Inchelium is very small and is unincorporated which means we do not get city or town funding. We only have a small amount of sidewalks that doesn't cover even half our town.

We struggle with keeping our youth busy especially the ones who don't participate in organized sports. Our community center has very limited hours and is not open on weekends which leaves kids without a place to do much of anything. I think the skate park would be beneficial in minimizing the negative activities like drugs and alcohol amongst our youth as well.

Please consider assisting us in providing a healthy and fun outlet for our kids.

Thank you for your consideration.

Re: Inchelium Skate Park

Hello my name is Sarah Finley, I am 42 years old. I have lived in Inchelium my whole life. I have volunteered in my community for years and love to do things for our community. I recently also started working for the Colville Tribes Diabetes Prevention Program. I think this skating park would be amazing for our youth and young adults. It will help keep our kids active and to have something fun to do. There isn't many areas to skate board or skate in Inchelium. The only sidewalks us a strip on Shortcut road and also School road, so not many areas for the kids to skate. I believe this would benefit for the whole community.

Sincerely,

SARAH FINLEY

INCHELIUM COMMUNITY MEMBER

I've only discovered Northeast Washington in the last couple years, but the landscape and people have left an indelible mark on me. Despite how remote and isolated the region is, I've found the people to be a delightful balance of earnest and friendly, a pattern mannerisms I've found to be very welcoming.

Unfortunately, the three counties of Northeast Washington are undergoing some growing pains. As the Natural Resources sector has exhausted some veins of minerals and turned to more sustainable timber harvesting methods, there has been an increased need for tourism, especially in the most remote parts of the region such as the Colville Indian Reservation.

If a skatepark were to be constructed in Inchelium, it would be a great signal to outside sources that Northeast Washington, and more importantly the Colville Indian Reservation are welcoming people and deserve to be paid attention to (and helped economically).

A recent Seattle Times article focused on the lack of internet infrastructure in the nearby community of Keller, on the San Poil River to the west. It is apparent that more responsible infrastructure development is needed, assuming it fits with the desires of the community. A skatepark in Inchelium would be a vital resource for the positive development of the area's youth, and also signal to the rest of the state how lovely the people and landscapes of Northeast Washington truly are.

Will, Walla Walla

Dear Boys and Girls Club:

We are in full support of a skateboard park in our tribal community of Inchelium, Wa. These parks seem to be of widespread interest to youth in rural areas. We are in great need of diverse healthy lifestyle activities in our tribal community.

There are opportunities for cost share projects for helmets and other safety equipment that we and perhaps our community members would support.

Please give this grant your priority consideration.

Sincerely,

Patricia L. Bailey and Donald J. Hurst

Greetings,

I lived in Ferry County for 20 years and still own property. I believe that skate board parks give youth an opportunity to be creative and have fun outdoors. I support the work of Bobby Whittaker and many others who are working to establish one in Inchellium. I hope that funding will come and the Park will be built as soon as possible.

Thank you for the opportunity to comment.

Thu, Jun 23, 12:17 PM

Hello!

My name is Trevor Roberts and I was writing to show my support for the Inchelium Skatepark. I am a member of the Fort Peck Assiniboine & Sioux Tribes, as well as Hopi. I have been skating for more than half my life now, after I first stepped on a skateboard at 14 years old. Without skateboarding, its hard to imagine the person I would be.

Skateboarding has brought so many amazing people and experiences into my life, and it all began with having a place to nurture and grow my passion. I am very proud of my accomplishments and place in the skate world, and having a dedicated space for community to grow is what allowed that to happen.

It has been proven that skateboarding builds resiliency in youth and gives them powerful tools they can use for the rest of their lives (Corwin et al. 2019). A skatepark is a great place to learn determination and commitment, while keeping young ones' time occupied with positive and rewarding experiences. Aside from the mental benefits, it is also a great form of physical exercise and fosters other talents such as filmmaking, photography, art, and music.

By building a skatepark you will be giving a gift that keeps on giving. The next Bryant Chapo, Joe Buffalo, or Dustin Henry could easily be one of the kids who doesn't even know they want to skate...yet. Once the surrounding community see's there is a space for a new exciting activity, young and old will show a keen interest.

I hope you'll find it in your hearts to help get this project off the ground. Thank you very much for taking the time to read this.

Trevor Roberts, age 32.

Letter of support!

I highly support a new skatepark in your town. I have skated for over 20 years and have seen first hand the positive impact a skatepark in a small town can do to the kids there. It may seem like a small and insignificant thing to some people, but skateboarding is a super positive and unique thing that changes and saves lives. Please put a park in Inchelium!!!

Dear Julie,

I'm not sure if you'll remember me. We've met a few times at different community events. I saw the announcement about the proposed Inchelium Skate Park and thought I would share some resources (attached and below) about skateboarding in Indian Country. Some of this content could be useful in grant proposals and other funding requests.

I include skateboarding in Native Americans and Sports classes I teach for a couple of reasons: the positive impacts of access to skate parks and a skate community are visible; and skateboarding is accessible to youth and college-age people. I have zero physical coordination so I'm not a skater myself, but I always say I am a skater at heart.

If I can support this project or if you would like me to look for additional resources like I've included here, please let me know. I'm happy to help.

limlmtx and best wishes,
Laurie

To whom it may concern:

I am writing in support of a skatepark in Inchelium. I live in Denver, Colorado and care about this community, thus I am writing to support the development of a skatepark. Skateparks can provide not only an area for people to recreate, but also provides a safe space for youth in the community to gather. I believe that a skatepark in Inchelium would provide so much benefit to the community and hope they are chosen for this program.

Sincerely,
Stephanie McGraw

Tue, May 17, 9:21 AM

Hi,

My name is Curtis Pitts. I live across the river in Fruitland. I have been skateboarding since I was 6 years old. I am now 52, and more passionate about skateboarding than I have ever been. Aside from my relationships with the Earth, my family, friends and especially my daughter, nothing is more important to me than skating. In Fruitland, there is no place to skate, so obviously I grew up somewhere else. I moved here when I was 26, thinking I was going to quit skating. I ended up making a ramp, and now have built my 4th ramp, so I can regularly skate. I want to keep skating into my old age. Thankfully one of the life skills I learned from skateboarding is self reliance.

Communities always promote the idea of a skatepark as something for the kids, sure, but I really see it a place for people of all ages. After this park IS built, there will be kids who start to skate. Some of those kids will grow up to be parents who will skate with their children. Some will continue to skate for the rest of their lives. This past summer in the olympic skateboarding bowl competition, we saw a 45 year old vs. a 15 year old!! In my community (Fruitland/West End), I see kids having fun with whatever they can, but probably the most fun adults have is drugs and alcohol. I was a everyday beer drinker until the day I realized how it was going to put the end to my skateboarding.

Anyone can be a skateboarder. It is a creative athletic activity that gets more satisfying the longer you do it. Skating is much more affordable than almost any comparable sport. Vastly cheaper than baseball, skiing, football, gymnastics, you name it, other than barefoot soccer?? I like all sports, but there is freedom in skating. You can skate any time (weather permitting). You can skate by yourself, or with friends. You can do it just to improve yourself, or you can strive to be a show off.

I am excited with the possibility of a skatepark in Incheleum! I believe it will be built, and I will be there opening day! Yesterday was the first I had heard of the proposal, and I would like to be involved in any way I can. I am not just a lifelong skater, but I'm a park enthusiast/afficionado. I study parks, build skate spots and ramps. I study skateboarding and am sort of a historian. I would like to lend my knowledge to the community, so please keep me abreast of any developments.

Thanks for all you do, Curtis Pitts 509 675 8701

Subject: Inchelium Skate Park Support

I am writing in support of the Inchelium Skate Park Project.

We are a small, tight community. And love to see our children have fun and do good things. With this Covid-19 going on these last two years are kids, lost interest in a lot of things. It makes me Happy that our Kids want this.

Inchelium is located in the remote mountains of Northeast Washington State, on the easternmost side of the 1.4 million-acre Colville Indian Reservation. Although surrounded by natural beauty, the area lacks safe and properly developed outdoor recreational facilities for kids. The closest skate park on the reservation is 87 miles away in the city of Omak, a two-hour drive over three mountain passes.

Local roads are narrow, and lack shoulders or proper sidewalks for children to walk, run, bike, or skate safely. This is a formula that puts area youth at risk of injury and discourages healthy outdoor activity.

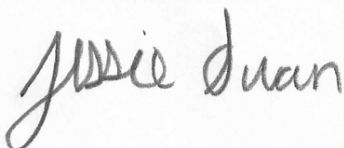

Positive points for the Inchelium Skate park:

- Skate parks in rural areas have proven to be beneficial to the health and wellness of their communities.
- The proposed location is visible and convenient, adjacent to the soon-to-be developed Wellness Center. It's near the Inchelium School Complex, and near the existing Community Center that houses the Boys & Girls Club.
- Kids from other towns could do field trips with Boys & Girls Clubs to visit the skate park.
- The draft skate park design has a concrete sturgeon-nose canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.
- The land for the skate park is already owned by the Tribe, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skate park project and look forward to seeing it succeed.

Sincerely,

Jessie Swan

A skate park in Inchellium would be a wonderful thing for our youth and community. The park would be a place of safety for much of our youth who suffer from exposure to domestic violence, drug and alcohol addiction. The skate park would serve as a healthy lifestyle option that keeps our youth healthy and active. The skate park would teach valuable social skills without drugs and alcohol as the conduit. Most importantly it would be a place where youth can just simply have fun. Our kids need a break from the social media life and what better way to do that by sharpening some skills. And, hey something to post about right! Creating opportunities for youth in our rural community is a breeze so go and whatever support is provided is much appreciated. Thank you for supporting this wonderful opportunity for youth and communities.

- 3) Kids from other towns could do field trips with Boys & Girls Clubs to visit the skatepark.
- 4) The draft skatepark design has a concrete sturgeon-nosed canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.
- 5) The land for the skatepark is already owned by the Tribe, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skatepark project and look forward to seeing it succeed.

RE: Inchelium Skatepark

TO: Boys and Girls Club of Inchelium

FROM:

I am writing in support of the Inchelium Skatepark project. Inchelium is located in the remote mountains of Northeast Washington State, on the easternmost side of the 1.4 million-acre Colville Indian Reservation. Although surrounded by natural beauty, the area lacks safe and properly developed outdoor recreational facilities for kids.

The closest skatepark on the reservation is 87 miles away in the city of Omak, a two-hour drive over three mountain passes.

Local roads are narrow, and lack shoulders or proper sidewalks for children to walk, run, bike, or skate safely. This is a formula that puts area youth at risk of injury and discourages healthy outdoor activity.

Positive points for the Inchelium Skatepark:

- 1) Skateparks in rural areas have proven to be beneficial to the health and wellness of their communities.
- 2) The proposed location is visible and convenient, adjacent to the soon-to-be developed Wellness Center. It's near the Inchelium School Complex, and near the existing Community Center that houses the Boys & Girls Club.
- 3) Kids from other towns could do field trips with Boys & Girls Clubs to visit the skatepark.
- 4) The draft skatepark design has a concrete sturgeon-nosed canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.
- 5) The land for the skatepark is already owned by the Tribe, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skatepark project and look forward to seeing it succeed.

- 1) Skateparks in rural areas have proven to be beneficial to the health and wellness of their communities.
- 2) The proposed location is visible and convenient, adjacent to the soon-to-be developed Wellness Center. It's near the Inchelium School Complex, and near the existing Community Center that houses the Boys & Girls Club.
- 3) Kids from other towns could do field trips with Boys & Girls Clubs to visit the skatepark.
- 4) The draft skatepark design has a concrete sturgeon-nosed canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.
- 5) The land for the skatepark is already owned by the Tribe, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skatepark project and look forward to seeing it succeed.

RE: Inchelium Skatepark

TO: Boys and Girls Club of Inchelium

FROM:

Billy Evans

I am writing in support of the Inchelium Skatepark project. Inchelium is located in the remote mountains of Northeast Washington State, on the easternmost side of the 1.4 million-acre Colville Indian Reservation. Although surrounded by natural beauty, the area lacks safe and properly developed outdoor recreational facilities for kids.

The closest skatepark on the reservation is 87 miles away in the city of Omak, a two-hour drive over three mountain passes.

Local roads are narrow, and lack shoulders or proper sidewalks for children to walk, run, bike, or skate safely. This is a formula that puts area youth at risk of injury and discourages healthy outdoor activity.

Positive points for the Inchelium Skatepark:

- 1) Skateparks in rural areas have proven to be beneficial to the health and wellness of their communities.
- 2) The proposed location is visible and convenient, adjacent to the soon-to-be developed Wellness Center. It's near the Inchelium School Complex, and near the existing Community Center that houses the Boys & Girls Club.
- 3) Kids from other towns could do field trips with Boys & Girls Clubs to visit the skatepark.
- 4) The draft skatepark design has a concrete sturgeon-nosed canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.
- 5) The land for the skatepark is already owned by the Tribe, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skatepark project and look forward to seeing it succeed.

The closest skatepark on the reservation is 87 miles away in the city of Omak, a two-hour drive over three mountain passes.

Local roads are narrow, and lack shoulders or proper sidewalks for children to walk, run, bike, or skate safely. This is a formula that puts area youth at risk of injury and discourages healthy outdoor activity.

Positive points for the Inchelium Skatepark:

- 1) Skateparks in rural areas have proven to be beneficial to the health and wellness of their communities.
- 2) The proposed location is visible and convenient, adjacent to the soon-to-be developed Wellness Center. It's near the Inchelium School Complex, and near the existing Community Center that houses the Boys & Girls Club.
- 3) Kids from other towns could do field trips with Boys & Girls Clubs to visit the skatepark.
- 4) The draft skatepark design has a concrete sturgeon-nosed canoe as a centerpiece to do tricks on. This is an educational component for kids to learn about the community's heritage.
- 5) The land for the skatepark is already owned by the Tribe, and a required Cultural Resources report has already been completed.

I fully support the Inchelium Skatepark project and look forward to seeing it succeed.

FROM:

David Lemery

I am writing in support of the Inchelium Skatepark project. Inchelium is located in the remote mountains of Northeast Washington State, on the easternmost side of the 1.4 million-acre Colville Indian Reservation. Although surrounded by natural beauty, the area lacks safe and properly developed outdoor recreational facilities for kids.

The closest skatepark on the reservation is 87 miles away in the city of Omak, a two-hour drive over three mountain passes.

Local roads are narrow, and lack shoulders or proper sidewalks for children to walk, run, bike, or skate safely. This is a formula that puts area youth at risk of injury and discourages healthy outdoor activity.
